DESCRIPTION

The Stone & Leather Coffee Table is a rugged, yet refined table with polished stone and leather inserts around a decorative centerpiece.

Coffee table top is defined by prominent leather tiles lined with stainless steel square rods making a delicate transition between materials. The solid table top is balanced on sturdy legs referencing details of the centerpiece visually tying all details together.

Conceptually, the Stone & Leather Coffee Table evokes images of a European café or lounge with durable finishes sure to last for many years. Wood framing, stone, leather and glass all come together in this unique composition.
